

MESA ENERGY

Mission-Critical Energy Support. Delivered Globally.

From pipeline construction to gas monetization, MESA Energy powers oil & gas projects with precision, compliance, and trusted execution.

Who We Are MESA Energy is the oil & gas services arm of Mesa Global Partners—offering technical support, operational logistics, and strategic advisory for infrastructure-critical energy projects across North America, Africa, and Europe.

Core Services Snapshot:

- Rig Support Services
- Pipeline Construction Support
- Strategic Sourcing
- Gas Monetization Solutions
- Energy Technology Enablement

Why Choose Us:

- Local + global operational presence
- Deep compliance expertise
- Field-proven results

- Trusted by EPCs and governments

Company Overview MESA Energy delivers high-performance oil & gas solutions across upstream and downstream sectors. As a subsidiary of Mesa Global Partners, we combine global strategy with local execution to support infrastructure-critical energy projects in Africa, the Middle East, and the Americas.

From rig logistics and modular gas systems to contractor due diligence and energy technology, our expertise is built for complex, compliance-intensive environments. We operate with speed, safety, and integrity—ensuring results that move projects forward and reduce operational risk.

Core Competencies

- **Upstream Services** – Rig logistics, manpower, waste management, tubular handling, pump jack fabrication, camp support
- **Downstream & EPC Support** – Pipeline oversight, permitting, QA/QC, bid advisory
- **Gas Monetization** – Modular plants, flare capture, LNG/CNG deployment
- **Strategic Sourcing** – Vendor audits, compliance vetting, procurement support
- **Field Technology** – Monitoring, asset tracking, data infrastructure
- **Equipment Supply & Transport** – Custom trailer manufacturing, marine logistics (barge access)

Strategic Differentiators

-  Global presence with in-country expertise
-  Full compliance with international and host-nation regulations
-  Provider of both services and equipment
-  Supports energy transition goals
-  Stakeholder and partner alignment for sustainable project delivery

Markets Served

- EPC Contractors & Developers
- National Oil Companies
- Public-Private Energy Programs
- Transition & Flare Risk Regions

Our Values

- Operational Integrity
- Environmental Stewardship
- Local Capacity Building
- Engineering Resilience

Let's Power Your Next Project Whether you're developing gas infrastructure in Nigeria or expanding operations in Texas, MESA Energy is your trusted execution partner.

Trailer Manufacturing & Equipment Supply Capabilities

Overview MESA Energy, through its specialized manufacturing partner division, brings over 30 years of trailer manufacturing experience to the energy logistics sector. Known for engineering excellence and a customer-first approach, we deliver quality-built trailers tailored for upstream and downstream operations across Africa, the Middle East, and the U.S.

Production Capacity

- 1,500 m² facility
- Output: 1 trailer/day | 6 per week | 25 per month
- Fast, scalable, and dependable production

Product Lines

- Curtain-Sided | Dry Cargo | Tipping | Bath-Type | Container | Square
- Lowbed | Platform | Tanker | Car Transport

Technical Specs

- High-strength "I" profile chassis
- 3 × 10-ton axle capacity
- Air suspension + shock absorption
- WABCO-compliant braking systems

Accessories & Custom Options

- Standard: Spare wheel holder, toolbox, bicycle guard, extinguisher cabinet
- Optional: Rear axle lift, dual spare holders

Finishing & Quality Control

- Sandblasted + chemically treated surfaces
- Epoxy primer + dual acrylic coat
- RAL color customization

Pump Jack Fabrication & Supply

MESA Energy, through its advanced fabrication partners, offers access to field-proven TM80-class pump jack units designed for high-efficiency oil extraction. These pump jacks are engineered for performance in extreme climates and are currently in operation across Kazakhstan, Congo, and Azerbaijan.

Key Highlights:

- Load capacity: 80 kN (8 tons), 1–8 strokes per minute
- Built with high-strength steel and precision-aligned components

- Energy-optimized design reduces consumption by up to 10%
- Proven reliability, low maintenance cost, and fast support availability
- Each unit tested and certified to international performance standards

Maritime Logistics & Barge Transport Access

MESA Energy supports infrastructure and materials delivery to hard-to-reach or offshore project zones through access to maritime transport solutions including barge networks. These capabilities serve energy developers and EPC contractors requiring heavy equipment delivery, fuel transport, or modular systems across inland waterways and coastal zones.

Capabilities Include:

- Energy-grade barge transport access
- Support for modular plant or heavy equipment delivery
- Regional transport alignment for West Africa, the Gulf Coast, and Middle East
- Integration with MESA's sourcing and logistics divisions for seamless movement

Summary This division enhances MESA Energy's ability to deliver turnkey logistics support and mobile infrastructure for energy clients globally.
